HYGRO® COTTON

Hygro® bomuld er en unik type bomuldsgarn med fibre, der har en hul kerne. Garnstrukturen gør det muligt for fibrene at optage luft, så håndklædet bliver mere fluffigt og fyldigt, vask efter vask og tumbling efter tumbling..

Hygro® Cotton is a unique cotton yarn which has a hollow core. The yarn construction allows the fibres trap air so that wash after wash, and tumble dry after tumble dry, the towels get fluffier and loftier..

COTTON

De vigtigste karakteristika for bomuld er fiberlængden, finheden og styrken, der gør håndklæderne mere bløde, glatte og glansfulde. Jo bedre disse karakteristika er, jo blødere, glattere og mere glansfuldt vil garnet være.

The most important characteristics of cotton are the fibre length, fineness and strength which makes the towels softer smoother and more lustrous.
